

The 1st Study Group with Industry is happening in Cyprus

125th European Study Group with Industry (ESGI)

The [1st Study Group with Industry](#) (125th European Study Group with Industry) is taking place in Cyprus, 5-9 December 2016, in order to initiate and enable long-term collaborations between academia and industry. **Study Groups with Industry** are week-long workshops where teams of mathematical scientists work on real and important challenges the companies and the society are facing today. They were initiated at the **University of Oxford** in 1968 and since then they have been successfully organised in more than 20 countries, leading to a multitude of long-term collaborations which achieved significant savings for companies and high-quality publications in scientific journals.

The 125th ESGI is organised by the **Mathematics for Industry Network** (MINET), in collaboration with the **Cyprus University of Technology**. MINET is an EU-funded network (COST Action TD1409) of 31 countries which facilitates the application of mathematics to all industrial sectors (and to other sciences). The 125th ESGI is also sponsored by MINET and **KPMG Cyprus** and is supported by the **University of Cyprus**, the **Research Promotion Foundation**, the **Limassol Chamber of Commerce and Industry**, the **British High Commission in Cyprus**, **RTD Talos Ltd**, the **Cyprus Tourism Organisation**, the **Cyprus Mathematical Society**, and **European Office Cyprus**.

If you are a company (or an NGO or a governmental department) you can submit a challenge to the Study Group at www.esgi-cy.org/register/company-registration/. 3-4 challenges will be selected.

Mathematical scientists (mathematicians, physicists, computer scientists or engineers with advanced mathematical expertise) can apply to join the Study Group as problem-solvers, at www.esgi-cy.org/register/researcher-registration/. Forty highly experienced academics from Cyprus and abroad are being selected.

The official opening and closing events of the 1st Study Group, on the 5th and on the 9th of December respectively, are open to all.
